the house in fata morgana live in osaka

A really nice line - shows the outstanding beauty of north west England. The scenarios included are mostly well made, although the timings on the power station career scenario are rather hard to make - but if you ignore that, there's lots of fun to be had shunting the cargo and running along the rather rough permanent way of the Morecambe and Heysham lines.

The class 87 is very good - driving this is much different to the diesels and requires you to think ahead a lot more due to the amount of time it takes for the tap changer to run up or run down. It's a little let down by the sounds - the Armstrong Powerhouse sound pack for the 87 really improve the loco but you're going to have to spend another \u00a35 at AP to get them. . Class 67 Diamond Jubilee is a great train. It only adds one scenario to the Great Western Main Line, but it looks great. It's fun to drive. The train is also accompanied by wagons, the king are also great. Its maximum speed is around 130km V h. I recommend buying when there will be some price tag because then it is really cheap.. Dam its good .I got it on sale ,cheap as chips but i should of brought the full game it that good !!. Someone in your PR department needs to be fired Paradox.. TLDR: The complexity really opens up as you learn the various mechanics making it a fun and challenging strategy game.

When I first started playing Epic Manager I thought it a bit simplistic, but as I played I started to realize that there was a lot of skill and knowledge required to be a particularly effective manager. Party compositions matter as much as knowing the individual heroes' strengths and weaknesses. You start to learn that certain enemies have specific weaknesses, making that particular element really useful for that fight. I'm half way through the game because it has a set amount of weeks you have in order to rise to the top. The really wonderful thing is that I'm already starting to realize how I could have better chosen my heroes to be more prepared for higher level fights. The fights are fun and challenging, and there is enough other content so that you can make a serious difference with your management.

I really recommend it for anyone looking for a slightly more relaxing (than Darkest Dungeon or XCOM) strategy game that isn't overly simplistic.

took me a bit, but this is a Markiplier fan game... although I should have guessed it at the beginning when "Mr. Baily" has a bright pink mustash... as well, there's an achievement called "Mark?" that you get after you discover a supply crate, the flavor text for the achievement is "is that you playing my game?" as well, there's another called "Bob? Wade?"

So, if your a diehard marki fan, then play this game, I got it for free on Indigala, and I wouldn't be surprized if he plays this game if he hasn't already :3. Does not run well on Ubuntu 15.10 + i7 + nVidia : animations run too fast and i'm unable to click buttons.. Just played the first 1.9 hrs of pure bliss 10V10

**MUST PLAY**

**P.D.**

I'm completely addicted to this game, you can play it alone or with friends and family. Waiting for new updates :v. boostmaister, olofmaister.. This 7th visual novel from InvertMouse feature two female protagonists - a human girl Tayo and a Birdling girl Bimonia who encounter each other in the forest while in their childhood years and form an unlikely friendship. Amidst the backdrop of a massive fear and dislike of each other between humans and Birdlings after a war which left only Bimonia and her mother Lulululu as the last Birdlings alive and living near human habitation together with multiple grey shades of morality among humans and Birdlings, Tayo and Bimonia's friendship and survival will be put to the test in this thriller and horror visual novel over 21 chapters as Tayo and Bimonia grow up to adulthood and reach different phases of their lives.

The game has plenty of save slots to allow different gameplay choices to be made during the game, with popup icons of a redVgreen feather and a portrait of BimoniaVTayo to help players reach all the 5 possible endings where the number of red and green feathers required to reach each ending will be shown. Soundtracks, artwork and overall game presentation are good. Recommended with soundtrack and artbook DLC when at discount or bundle offer as it takes less than 10 hours to reach all endings.

(Also recommended to download and finish the demo version of this game before buying this game and adding to library for an additional easy to finish 100% completed game). It's a nice challenging map. Buy it to support the devs :). One of the best puzzle games ever made. It's fast paced, its intense, the music and sounds are awesome and its easy to learn. Skill shots and combos are Oh so satisfying and lining up that perfect shot will make you feel like a badass. The game is colorful and vibrant and feels alive, what's better is that the graphics have aged quite well for a 10 year old game.

If you've never played a Zuma game I would highly reccomend you pick this one up. It may not look like much but you will find yourself quickly turning minutes into hours.. Between the buggy, non-existant controls, and the absurd spawning of enemies, this game is as close to unplayable as anything I've played. I was a Kickstarter backer of this game, and hoped that they would iron everything out...but the 1.0 launch dashed those hopes and it may as well be considered abandonware at this point.

Abandon hope, all ye who enter here.. I used to play Clutch when I was a child. I have reinstalled this game recently- it appealed to me. Let me present you my short review:

**Gameplay:**

Zombies included. Cars included. There should be more enemies on the map to make a real slaughterhouse.

**Graphics:**

The game looks quite nice- partly destructible environment, zombies can be dismembered in a variety of ways. Heads-up display is nasty in my opinion- too many indicators on the screen.

**Soundtrack:**

Pleasant music, but slaughtered zombies scream like normal people.

This game is worth buying: it can provide you with lots of fun- this mix of zombie slaughter and racing is really entertaining.. The game is enjoyable for a few hours then the lack of depth begins to show, also the dev abandoned the game.
